Mechanic helpdesk query

Clearing A Paper Print – After Batch File Changes.

This document shows how to reset / clear the automatic paper printouts that occur when any changes are made to the Mechanic setup batch files.

This procedure is required to stop the automatic printing of warnings if the user has changed any of the following setup / configuration files.

> CONFIG.SYS
> AUTOEXEC.BAT
> MECH.BAT
> NMECH.BAT

From the main menu, select option 6 - System Maintenance.

You will need today's password. Call the Mechanic support line on 1300-880-193.

From the System Maintenance menu, select option 9 – Support.

From the Support menu, press Page-Down three times to get to option 36 - Clear paper print.

Enter in the same password again and press [ENTER].

Type in your initials and press F10 to return to the Support menu.

Press the backspace key to return to the main menu.

From the main menu, select option 0 - Quit Mechanic.

Restart Mechanic and the paper print message will be gone.
